

B.Tech Project (BTP) at IIIT, Hyderabad

Revised in January 2026

Introduction:

BTP is an optional program for undergraduate students spread over 2 semesters (BTP-1 in the 6th semester and BTP-2 in the 7th semester). At the beginning of the 6th semester, students may choose BTP among the proposals offered by different faculty members based on their interest.

In addition to the *regular BTP track*, to promote innovation in the country, the institute has initiated a *startup track* for BTP. Students may either select from or propose startup project ideas to faculty members who are open to mentor such projects. Such student-faculty teams can consult the TTO office (Prof. Prakash Yalla) when their projects are ready to be taken to the next stage of the startup life-cycle.

i) Project Proposals to be uploaded by faculty: Faculty can upload project proposals in IMS (BTP -> BTP Project Proposal -> Batch -> Add New)

ii) Registration Process:

- Students should register for the BTP-1 before start of the Spring semester through IMS.
- Students may choose BTP proposals offered by faculty members i.e., existing proposals, or they should add a project by consulting the respective faculty.
- Students should register their BTPs in their course registration page viz., BTP-1 in Spring semester and BTP-2 in the Monsoon semester, before the registration deadline.

iii) Evaluation Process and Rubric: BTPs will be evaluated by respective faculty advisors (similar to evaluation of Honours projects). Students should follow the requirements of meetings, presentations, reports and deadlines as required by their faculty advisor, and finally submit a BTP report on IMS by the notified end-of-semester deadline.

The faculty advisor should record marks for (1) Effort (2) Learning and (3) Deliverable for BTP-1 and BTP-2 on IMS, and assign a final grade that reflects these parameters, along with any additional parameters pertaining to the project, as may have been notified in the grading policy of that project.

To attain project deliverables, based on advisor approval, a one-time extension of the end-of-semester deadline will be allowed as notified in the almanac, after which the grade may be updated on IMS. No further extensions will be entertained.

BTP Conversion Guidelines:

It is advised to do both BTP-1 and BTP-2 under the same faculty member and in the same track (i.e. regular/startup) to achieve a significant outcome. However, conversion is still possible.

- In case a student wants to change their advisor for the BTP-2, follow the below steps.
 - Take consent of existing advisor for leaving.
 - Take approval of new advisor for registration of BTP-2.
 - Inform academic office at the beginning of course registration for the Monsoon semester.

- Conversion requests for changing tracks are allowed at the end of each semester.
- Students should request the academic office for conversion of track of BTPs.
- Dean (A) will review such requests before starting the next semester. If approved, students can change their track for BTP-2.
- If a student wants to stop BTP-1 in between the semester, they can continue BTP-1 and BTP-2 in their 7th and 8th semesters subject to approval of Dean (A).

BTP appeals/moderation committee: To handle occasional appeals for grade moderation/revenue sharing (for startups) etc., Dean (A) will set up a process for these appeals.
