

Academic Regulations for Master of Science by Research / Dual Degree Programmes

Updated in October 2023

Master of Science by Research

This is a research-oriented programme. The admitted students are expected to have an advanced CS/ECE background. There is no prescribed coursework for this programme. Students should use the first year to make up for the deficiencies in their background, if any, and to gain advanced knowledge into the stream area of their choice.

Breadth/Depth Requirements:

A student should demonstrate the knowledge of the basic courses in at least 4 of the stream areas and must take an advanced course in a minimum of 3 stream areas.

Credit Requirements:

A student should take 48 credits at the institute to be eligible for the Master of Science degree of which at least 24 credits should be through course work and at least 24 of which should be MS thesis credits. Credits of courses at level 400 and above only count towards the degree. At most 4 credits of project/independent Study can count towards this. Students must register for at least 12 credits every semester.

Seminar Credits:

MS by Research Students have to do 1 seminar credit each up to 4 semesters. Details are available on intranet https://intranet.iiit.ac.in/offices/static/files/Institute_Seminar_Credit_Policy.pdf

Master of Science Thesis:

Once the student completes his/her Thesis work, he/she has to submit the Graduation Request Form (GRF) in the academic office as per the guidelines given on intranet https://intranet.iiit.ac.in/offices/static/files/Graduation_Request_Form-2K19_%281%29.pdf

Note that the thesis document must use the template / format provided in the GRF document. Otherwise, thesis will not be processed further.

The Master of Science thesis has to be defended to a committee of typically consists of 3 faculty members including the advisor, a faculty member nominated by PG Chair and a nominee of the Dean (R&D).

Academic Performance:

A student should complete the requirements with a minimum CGPA of 7.0 to receive the Master of Science degree.

Residency Requirements:

Full-time students: Minimum of 3 semesters and maximum of 6 semesters.

Part-time students: Minimum of 3 semesters and maximum of 8 semesters.

Fees:

Full-time fees during the semester registration

Master of Science by Research as a Dual-Degree Programme

The students of the dual-degree programme receive an Master of Science by Research degree in the respective discipline along with a B.Tech degree. These students follow the respective B.Tech programme for the first four years with the following modifications:

1. They join an honours stream of their choice at the end of 4 semesters and follow all requirements of the honours programme.
2. They must complete 16 credits over the total minimum credit requirements for B.Tech (typically during the first four years). The distribution of this could be:
 - 2 credits each of honours project work during the 5th to 8th semesters (4 credits in lieu of BTP).
 - Three additional stream courses of at least 4 credits each during the 5th to 8th semesters.
3. 24 credits worth of Master of Science thesis work with the same guidelines as the Master of Science by Research given above.

Credit Requirements:

A student should take 16 credits over the total minimum credit requirements for B.Tech (typically in the first 4 years) and 24 credits of Master of Science thesis (typically in the fifth year).

Seminar Credits:

Dual Degree Students must do seminar credits as specified in the respective programme curriculum. Details are available on the intranet. Appropriate URLs are given below:

<https://intranet.iit.ac.in/offices/static/files/UG-DD-Curriculua-Oct22.pdf>

https://intranet.iit.ac.in/offices/static/files/Institute_Seminar_Credit_Policy.pdf

Master of Science Thesis:

Same as the Master of Science programme guidelines.

Academic Performance:

The student should complete the requirements with a minimum CGPA of 7.0 for the 5 years to receive the MS degree.

Residency Requirements:

Minimum of 10 semesters, maximum of 14 semesters. The BTech degree has the date when s/he completes 8 semesters of study and fulfils all the requirements of B.Tech (except for honours projects credits in lieu of B.Tech project credits) at the institute. The B.Tech degree is given together with the Master of Science degree after completing all requirements for the Master of Science programme.

Converting to the single-degree programme:

Students admitted to the dual-degree programme from the start cannot convert to a B.Tech only programme.

Student status:

The student on this programme is considered to be an undergraduate student for the first 4 years and a post-graduate student subsequently ordinarily. A student with more than 8 credits of coursework after the end of 4 years will be considered an undergraduate student.

Fees:

Undergraduate fees apply when the student has a UG student status and MS by Research fees will apply thereafter.
