

Overload Registration Guidelines

Updated in July 2024

The UG/DD/PG curriculum provides the number of credits that need to be taken in a semester by a student. A student with CGPA less than 5.5 can take only maximum of 16 credits in the following semester.

Minimum Credits to be taken in a Semester

A student is expected to register for at least 16 credits (12 credits for PG) in a semester. (If the registration falls below 12 credits, the student is considered as a "part-time" student.)

UG3, UG4 and M.Tech-2nd year students who are planning to register for extra credits over the normal load (total credits mentioned in the course offerings) have to request the Academic office through an online **MS form** as per the timelines mentioned at the beginning of each semester.

Guidelines/Eligibility for OL course Registration:

- Overload is allowed in UG3, UG4 and M.Tech-2nd years for Full Time Students.
- **CGPA > 6.5 and no F grades** in the just concluded semester.
- SGPA in the just concluded semester should be above 7.5 for overload in UG3, above 7.0 for overload in 4-1, and above 6.5 for overload in 4-2, above 7.5 for M.Tech-2nd year.
- Overload is 4 to 6 credits beyond the normal curriculum load, so the total credits are not more than 24 (26 for DD, 20 for M.Tech).
- Students with one W grade in any semesters 5 to 8 (2 to 3 for M.Tech) can be overloaded by four credits provided they do not have a D or below grade in the just concluded semester.
- For cases that are exceptions to the above overload conditions, the academic office will send them to the respective program coordinators for approval on a case-by-case basis.

Guidelines for MS & PhD students:

- Maximum credits allowed in a semester during their coursework are 12 for full-time students, 8 for part-time students
- Upon completion of coursework, students may be allowed to register for overload thesis credits during Thesis work.
- Such students may forward their guides recommendation to Academic office to register 4 more thesis credits in a semester.
- After the Overload, the maximum credits allowed during their thesis work are 16 for full-time students, 12 for part-time students

Frequently Asked Questions

Q1. I have completed minimum credits for graduation, do I still have to take a minimum of 16 credits in a semester?

A1. YES. You have to take minimum of 16 credits each semester.

Q2. I have failed in few courses, I want to overload to take these courses.

A2. Within the limit of credits you can take in a semester, take first the courses that you have failed and postpone other courses to later years.

Q3. I want to take 32 credits, allow me. I am final year student allow me to take 28 credits.

A3. The maximum credits a student can take in a semester is 4 credits more than the suggested curriculum load in that semester.

Q4. My CGPA puts me to take 20 credits, but the course I want clashes with a core course I have failed and need to take that.

A4. In this case take the core course and complete that requirement, postpone the elective course and/or other course to later semester.

Q5. What are the exceptional circumstances to overload my registration with an extra course.

A5. There is flexibility in the curriculum, if you really need to take any course in a semester you can do it and postpone taking some other course (required/elective/open elective) to future semesters.

Sometimes you might want to really take an extra course because the faculty teaching it may not do it again before you graduate. In that case, Dean may give you permission to take this extra course. This permission is given to fourth year students because they are graduating, and third year students if the course is not going to be offered again before they graduate, and almost never to second year students.

There must be a compulsive statement for both fourth year students and third year students about how the course will help you in your future work at the institute, and more importantly why you cannot drop/postpone any other course for taking this course.
