

Post-Graduate Programmes Admissions Policy

29th October, 2004

Post-Graduate Programmes:

The following degree-oriented PG programmes are currently being conducted at the institute.

1. M.Tech programmes in Computer Science and Engineering, VLSI and Embedded Systems, Computer Aided Structural Engineering, Computational Linguistics, Bioinformatics.
2. MS by Research programmes in Computer Science and Engineering, VLSI and Embedded Systems, Communications & Signal Processing, Computer Aided Structural Engineering, IT in Building Science, Bioinformatics, Power Systems, Computational Linguistics.
3. Ph.D in Computer Science and Engineering, VLSI and Embedded Systems, Communications & Signal Processing, Computer Aided Structural Engineering, IT in Building Science, Bioinformatics, Power Systems, Computational Linguistics.

The following non-degree PG programmes are also run by the institute:

1. PG Diploma in Computational linguistics.
2. Post-Graduate Student Status Programme (PGSSP) provides an opportunity for students to register for courses at the institute for which they have the required background. This is meant for the professionals and others in this area to enhance their knowledge through the courses at the institute. Students are given reports on their performance in courses taken under this programme.

Admissions:

MTech programmes:

The screening is through the Post-Graduate Entrance Examination (PGEE) conducted by the institute around May of each year. PGEE consists of a fundamentals paper consisting of aptitude and essentials of computing. It also has subject papers suitable for the programmes such as Computer Science, Engineering Mathematics, Electronics & Communications, Structural Engineering, etc.

Qualified candidates are called for an interview at the institute in the third week of June. A panel of faculty members interviews the candidates and makes the selection based on the aptitude and suitability of the candidates.

Part-Time MTech programmes:

Part-time MTech programmes have exactly the same academic requirements as the full-time programmes. Admissions to this programme can be made on the basis of the PGEE and interviews. Students can be admitted to this programme directly after they complete at least 2 courses under the PGSSP programme at the institute based on the performance in them.

Research Programmes:

The MS by Research and Ph.D. programmes are research-oriented programmes suitable only for students with aptitude for it. There are two modes of admissions into these programmes.

1. PGEE and Interview: Selected candidates from PGEE are interviewed by a panel of faculty members to evaluate a candidate's aptitude and readiness to perform research at high levels.
2. Standing Committee: To facilitate the admission of motivated students to the research programmes, the institute has set up a standing committee for admission to this programme. Candidates can apply to this committee with their academic record, research achievements, recommendations from eminent people, and a statement of purpose at any time in the year. The committee meets to evaluate the student based on his or her research achievements, motivation, and capabilities. Suitable candidates are given admission into the MS or PhD programme right away. Others may be called for an interview by a faculty committee and admitted into the programme based on its recommendations. Students admitted by the standing committee can start their research work immediately

Eligibility:

The post-graduate programmes and their eligibility are indicated below:

M.Tech programmes:**Computer Science and Engineering**

BE/BTech/MSc in Maths or Science/MCA

VLSI and Embedded Systems

BE/BTech in ECE/EE/EEE/CS/IT/Instrumentation

Computer Aided Structural Engg

BE/BTech in Civil Engg

Computational Linguistics

BE/BTech/Master's in Science

Bioinformatics

BE/BTech in CS/Master's degree in Maths

MS by Research:

Computer Science and Engineering

BE/BTech in CS/ECE/EE/EEE/IT/Instrumentation

VLSI and Embedded Systems

BE/BTech in ECE/EE/EEE/CS/IT/Instrumentation

Communications & Signal Processing

BE/BTech in ECE/EE/CSE/IT/EEE or Master's in Science

Computer Aided Structural Engg

BE/BTech in Civil Engg

IT in Building Science

BE/BTech/BArch

Bioinformatics

BE/BTech in CS/Master's in Maths or Science

Power Systems

BE/BTech in EE or ME/MTech in Power systems

Computational Linguistics

BE/BTech/ME/MTech or MA or MPhil in linguistics, languages

PG Diploma:

Computational linguistics

MA or MPhil in linguistics, languages or related areas

Ph.D:

Computer Science and Engineering

BE/BTech/ME/MTech/Master's Maths/Sc/MCA

VLSI and Embedded Systems

BE/BTech/ME/MTech in ECE/EE/EEE/CS/IT/Instrumentation

Communications & Signal Processing

BE/BTech/ME/MTech in ECE/EE/CSE/IT/EEE, Master's Degree in Science

Computer Aided Structural Engg

BE/BTech/ME/MTech in Civil Engg

IT in Building Science

BE/BTech/ME/MTech/BArch/MArch

Bioinformatics

BE/BTech/ME/MTech in CS or Master's degree in Maths or Science

Power Systems

BE/BTech in EE or ME/MTech in Power systems

Computational Linguistics

BE/BTech/ME/MTech or MA or MPhil in linguistics, languages
